

# CUTTER SEGMENTS

We supply HDS cutter segments with straight saw body or gradation style with the blade thinner at the tooth area. Of course all segments are designed and manufactured to our strict quality parameters.

Once your cutter segments manufactured for you have been added to our database, we can supply you with segments at any time, automated and with reproducible quality. We therefore guarantee outstanding and consistent product quality.

**b** Saw body thickness . **BST** Collar thickness . **D** Diameter . **d** Bore  
**NL** Pin hole . **SF** Kerf . **SL** Countersunk hole

Dimensions: D x SF/b/BST x d

## Cutter segment for Linck

Dimensions	411.5 x 3.5/2.5/8.0 x 210 mm
Teeth	10 TCT teeth . Tooth type 4
Features	AST: from Ø 354 mm one side left gradation to 2.5 mm 5 pin holes 9 mm one side right flat countersink
HDS-No.	11191 RO/LU / 11192 RU/LO
